# Chapter 1. User's Guide

## 1.1. Overview

This module export functions necessary for group membership checking over radius. There is a database table that contains list of users and groups they belong to. The table is used by functions of this module.

## 1.2. Dependencies

### 1.2.1. SER Modules

The following modules must be loaded before this module:

- None.

### 1.2.2. External Libraries or Applications

The following libraries or applications must be installed before running SER with this module loaded:

- *radiusclient library.*

## 1.3. Exported Parameters

### 1.3.1. `radius_config` (string)

Location of the configuration file of the radius client library.

*Default value is “/usr/local/etc/radiusclient/radiusclient.conf”.*

#### **Example 1-1. Set `radius_config` parameter**

```
...  
modparam("group", "radius_config", "/etc/radiusclient.conf")  
...
```

### 1.3.2. use\_domain (integer)

If set to 1 then username@domain will be used for lookup, if set to 0 then only username will be used.

*Default value is 0 (no).*

#### Example 1-2. Set use\_domain parameter

```
...
modparam("group_radius", "use_domain", 1)
...
```

## 1.4. Exported Functions

### 1.4.1. radius\_is\_user\_in(URI, group)

The function returns true if username in the given URI is member of the given group and false if not.

Meaning of the parameters is as follows:

- *URI* - URI whose username and optionally domain to be used, this can be one of:
  - Request-URI - Use Request-URI username and (optionally) domain.
  - To - Use To username and (optionally) domain.
  - From - Use From username and (optionally) domain.
  - Credentials - Use digest credentials username.
- *group* - Name of the group to check.

#### Example 1-3. radius\_is\_user\_in usage

```
...
if (radius_is_user_in("Request-URI", "ld")) {
    ...
};
...
```

## **Chapter 2. Developer's Guide**

The module does not provide any sort of API to use in other SER modules.

## Chapter 3. Frequently Asked Questions

### 1. Where can I find more about SER?

Take a look at <http://iptel.org/ser>.

### 2. Where can I post a question about this module?

First at all check if your question was already answered on one of our mailing lists:

- <http://mail.iptel.org/mailman/listinfo/serusers>
- <http://mail.iptel.org/mailman/listinfo/serdev>

E-mails regarding any stable version should be sent to [<serusers@iptel.org>](mailto:serusers@iptel.org) and e-mail regarding development versions or CVS snapshots should be send to [<serdev@iptel.org>](mailto:serdev@iptel.org).

If you want to keep the mail private, send it to [<serhelp@iptel.org>](mailto:serhelp@iptel.org).

### 3. How can I report a bug?

Please follow the guidelines provided at: <http://iptel.org/ser/bugs>
